PROFILE

Hello! I am a passionate Wep Developer with a proven track record of developing and maintaining high quality software solutions. Multi-skilled, hardworking and looking to enhance and expand my skills. Committed to improving myself and updating my knowledge in my field. Looking for new difficult situations and different experiences.
Efficiently build user interfaces using front-end frameworks and libraries. I master responsive design, interact with the backend, and collaborate with the work team. I seek to improve my skills, learn new technologies, and contribute to creating innovative and sustainable web solutions.

WORK EXPERIENCE

From 2021 to 2022:

I participated in an educational course on website development using JavaScript and the React library with the kodluyoruz organization.
I developed and completed all the projects and exercises required in the course successfully and to a high degree. And I got a degree

From 2022 to 2023

I trained at Mr. Bit Academy and we worked on various projects, including personal websites and online stores, and I created my own portfolio.
I obtained a certificate at the end of the training

PROJECTS

I created an introduction page for a burger restaurant that displays and introduces the existing products using html css

I created a book store that displays available books with the ability to add more than one product to the cart and delete products from it using html, css and javascript.

I created an online store that displays different products coming from an external API with the ability to create an account, log in, add products to the cart, modify or delete them, and the ability to search for a specific product, in addition to a control panel that creates new products, deletes products, or modifies existing products by the admin.
